OSU STUDENT PROFILE
FALL SEMESTER 1982

PREPARED BY
OFFICE OF INSTITUTIONAL RESEARCH
OKLAHOMA STATE UNIVERSITY
STILLWATER, OKLAHOMA
OCTOBER 25, 1982

INTRODUCTION

The Office of Institutional Research together with a Users Advisory Committee presents the second publication of the Oklahoma State University Student Profile. The objective with the publication of this document is to provide descriptive information on previous and present Oklahoma State University student enrollment and to depict trend data in a manner which is useful in planning for the challenge which lies ahead. This report may be used as an internal reference to assist the University community to better understand the University's most important resource--its students.

Upon reviewing this year's publication, one will find an increase in the amount of statistics presented about the current student enrollment over last year's publication. While the publication cannot contain all available information, it does present a comprehensive profile of most student information which has been requested by Oklahoma State University administrators. If a specific statistic of descriptive student information is needed and cannot be found in the publication please contact our office, for we may have the information available, but was deemed not to be of use to most users and thus was not published. This profile is intended as a "Living Document" to which additional information will be added; the current plan is to update the entire report each year.

So that it may become a more effective document, users of this publication are encouraged to direct comments, questions and suggestions about its contents to the Office of Institutional Research.

RETENTION OF OSU NEW FRESHMEN
CONTINUED TO SECOND YEAR
FALL SEMESTERS 1976 THROUGH 1982

Fall Semester	Percent Who Returned	Percent Who Dropped
1976	72.5%	27.5%
1977	73.0%	27.0%
1978	72.9%	27.1%
1979	72.6%	27.4%
1980	73.9%	26.1%
1981	71.7%	28.3%

Note. Retention is defined as the percent of enrolled students of a fall semester who return for the following fall semester.

OSU STUDENT RETURN RATE BY CLASSIFICATION
 FALL SEMESTERS 1978 THROUGH 1981
 (EXPRESSED AS PERCENTS)

Return Rate	1978	1979	1980	1981	Average
Freshman Class	68.2	68.2	69.1	68.1	68.4
Sophomore Class	74.9	74.7	77.2	76.9	75.9
Junior Class	75.5	76.7	76.1	75.9	76.1
Senior Class	22.3	22.5	26.7	28.7	25.1

Note. Return rate is defined as an enrolled fall semester student returning for the following fall semester as an undergraduate student.

Return rate is computed by comparing the previous fall semester class to the current fall semester class by matching on student identification number. If a student's identification number matches, he/she is a continuing student. An example is: Of the 5,258 freshmen for Fall 1979, 3,587 returned the following fall semester giving a return rate of 68.2.

Note. A non-returning student is defined as a student who was enrolled at OSU for the Fall Semester 1981 but who did not graduate and who did not return to OSU for the Fall Semester 1982. The data presented above shows non-returning students as a percent of the total enrollment (by class) for the Fall Semester 1981. The percent of the previous fall semester class which graduated (% Grad) is also presented.

OSU FALL SEMESTER HEADCOUNT ENROLLMENT PROJECTIONS

The OSU undergraduate student body during the 1970's was composed of about 90% resident and 10% non-resident students. This changed in the Fall Semester of 1981 to 88% and 12%, respectively. For the Fall Semester of 1982, this distribution has changed to approximately 87% and 13%, respectively. This change has a small effect on our enrollment projection models which have been used in the past.

The new freshman class each Fall Semester usually follows the residency distribution pattern of the total undergraduate student body. This also proved to be true for the Fall Semester of 1982. Since 87% of the new freshmen class are resident students, the public high schools of Oklahoma are Oklahoma State University's major source of students. Therefore, our enrollment projections must have the projection of Oklahoma public high school graduates as its basis.

Each year the Oklahoma State Department of Public Education publishes a report illustrating the flow of students in public school systems of Oklahoma. This document is the source from which we project Oklahoma public high school graduates for the next eleven years in order to project the new freshmen class at Oklahoma State University.

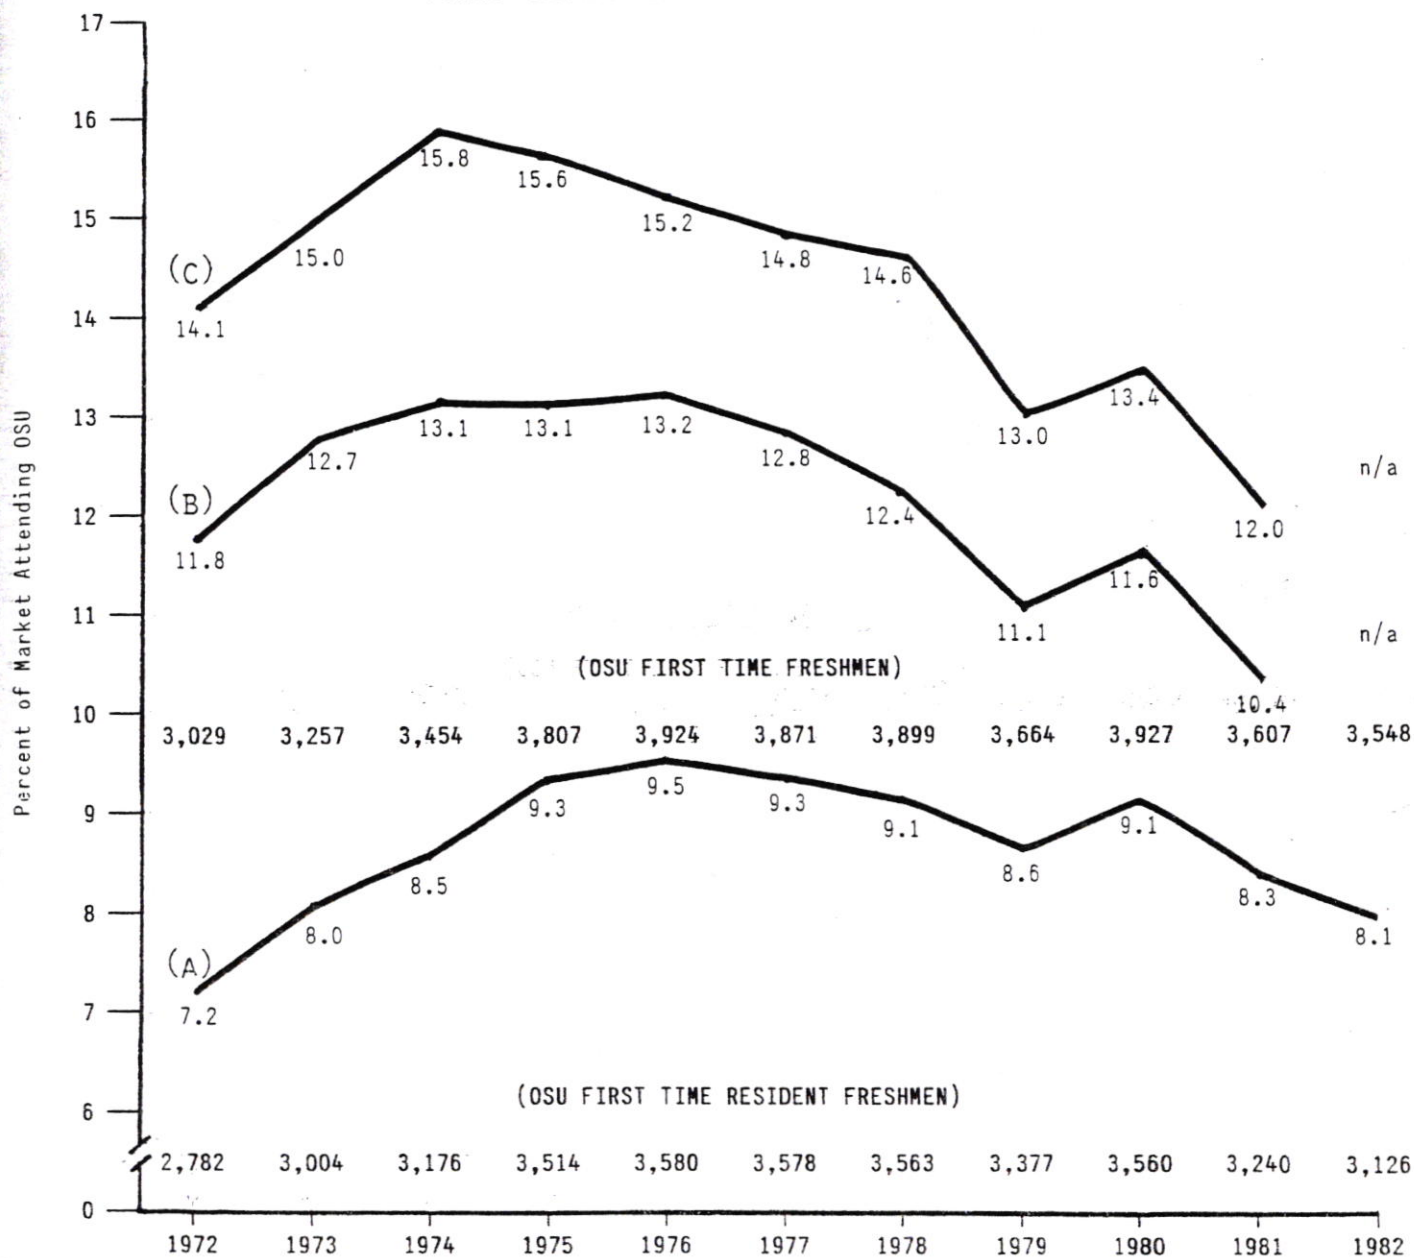

A retention study is done each fall illustrating the flow of students from class to class with respect to the previous fall semester to the present fall semester. Upon reviewing these studies, one finds the retention of a specific class varies little from year to year, but the distribution of the students to different classes varies more. Example: For the Fall Semester of 1979, 68.2%

of the freshmen class returned the following fall of 1980; for the 1978 fall semester, 68.2% of the freshmen returned the following fall of 1979; but in 1980, 11.8% of the freshmen from the previous year were classified as freshmen, while in 1979, 14.3% of the previous year's freshmen were classified as freshmen. As in 1979 and 1980, 68.2% of the fall freshmen class of 1981 returned in the fall of 1982, but 2.6% of them were classified as freshmen which is different when compared to the same statistics for 1979 and 1980.

Using this information as the basis for the projection models, one can develop models which project the overall retention better than a particular group advancing to the next class. This method decreases the amount of error when projecting total headcount.

Graduate enrollment is not easy to project with respect to the same variables as undergraduate enrollment. The job market (which many believe has had a more than usual effect on Fall enrollment 1982), the amount of available funding for graduate students from departments and the emphasis of the departments on recruiting graduate students are major factors affecting enrollment and must be taken into consideration when making projections. Input by the graduate dean on policy and future funding is reflected in the graduate enrollment projections.

Note. Usually the resident projection is obtained by using the past five year average of ratios of OSU resident fall semester new freshmen to the number of high school graduates of the respective years. This average ratio computes to be .086. The ratio has continued to drop for the past three years and a major turnaround is not expected in a one year period. Therefore, a reduced figure is used for the next two years. For fall 1983 and 1984, .081 and .083 are used respectively, then the .086 is applied for the remaining years.

GLOSSARY

Classification

Classification describes the student level and/or type and includes new freshmen, other freshmen, sophomores, juniors, seniors, special undergraduates, special graduates, masters, doctorates, Veterinary Medicine students, and Educational TV students.

College

The university is divided into six undergraduate colleges: Agriculture (Ag); Arts and Sciences (A & S); Business Administration (Bus); Education (Educ); Engineering, Technology and Architecture (DETA); and Home Economics (HE). Data for Engineering, Technology and Architecture are sometimes divided into two data sets--one for the School of Technology (Tech Inst or School of Tech), and the second for Engineering and Architecture (Engr).

In addition to these six undergraduate colleges, there are the Graduate College and the College of Veterinary Medicine. In this report, students enrolled in the Graduate College are usually distributed for reporting purposes to the respective undergraduate college which administers their major coursework.

Educational TV Student

An educational TV student is a student enrolled at OSU who is taking OSU coursework exclusively via the Oklahoma State Regents for Higher Education's Talk-Back television system.

Race Codes and Definitions

For purposes of reporting OSU enrollment by race, the total enrollment at OSU excluding non-resident aliens (Non-U.S. citizens) is divided into the following categories:

White: All persons having origins in any of the original peoples of Europe (except Spain and Portugal), North Africa (above the Sahara), or the Middle East. This category would include, for instance: Italy, France, the British Isles, Scandinavia, Germany, Russia, Romania, Greece, Turkey, Morocco, Algeria, Libya, Egypt, Iraq, Israel, Saudi Arabia and Iran.

Black: All persons having origins in any of the original peoples of Africa south of the Sahara.

Hispanic: All persons having origins in any of the original peoples of Spain and Portugal. This category would generally include, for instance: Chicanos, Mexican-Americans, Mexicans, Central and South Americans, Cubans, Puerto Ricans, Spainards, and Portuguese.

Asian: All persons having origins in any of the original peoples of the Far East, Southeast Asia, or the Pacific Islands. This category would include, for instance: China, Japan, Korea, Thailand, Vietnam, the Philippines, Samoa, Indonesia, New Zealand, Australia, and the Indian sub-continent which includes all persons from Afghanistan, Nepal, Burma, India, and Pakistan.

Native American: All persons having origins in any of the original peoples of North and South America.

In order to present a set of data regarding OSU enrollment which sums to OSU's total enrollment (including non-resident aliens), some tables and figures which present data by race in this report include an additional column or row of data pertaining to the balance of the student body--the non-resident alien population.

Resident Status

A student is categorized as a resident if he or she was a legal resident of the State of Oklahoma at the time of original admission to OSU. If not a

legal resident of Oklahoma at the time of admission, the student is a non-resident. If the student was a legal resident of a country other than the United States at the time of admission the student is categorized as a non-resident alien.

Retention

Student retention is usually expressed as a percentage figure which is derived by comparing the size of a specific group of students who were enrolled at OSU for a given semester to the size of the same group when they are enrolled for a successive given semester.

A non-returning student is defined as a student who was enrolled at OSU for a given semester and who did not graduate and who did not return to OSU for a successive given semester.

Special Undergraduate/Graduate Student

A special undergraduate student is one who has not yet selected a major. A special graduate student is a student with a bachelor's degree from an accredited college or university who is admitted to the graduate college and is taking courses at OSU, but who does not have immediate plans to become a degree candidate.

Students Enrolled at University Center at Tulsa

With the exception of the 47 students who are also enrolled in classes which are offered at OSU's main campus in Stillwater, the students who are exclusively enrolled in courses offered by OSU at the University Center at Tulsa are not included in OSU's enrollment figures.

Type of Admission

New students admitted to OSU are classified as a new freshman, a transfer student or a readmission. All other students are classified as returning students. A transfer student is classified as such only for the first semester that he attends OSU; after one semester a transfer student is reclassified as a returning student. Similarly, new freshmen are reclassified as returning students after their first semester at OSU (and are sometimes shown as "other freshmen" when presenting data by classification). A readmission student is a student who has enrolled at OSU in the past but who has not been enrolled at OSU during the previous semester (excluding the summer semester).
